NASA Contract NAS5-01101

The Goddard Library - IIS & ZAI

Image &
Movie
Archive of
Goddard's
Earth &
Space Sciences

IMAGES is a unique and growing collection of over 1,000 images and movies representing Goddard's scientific contributions.

The inclusion of these Goddard scientifically derived images in the NASA Image eXchange (NIX) expands the coverage and increases the variety of images in NIX. Previously few Goddard images were available.

Sample instrument images include:

| | |
|--------|----------|
| Hubble | RXTE |
| Cobe | SOHO-EIT |
| MODIS | TRMM |
| EOS | RSD |

CIO Pilot Project

In 2001 the Goddard Library received funds from NASA's CIO Office to investigate and pilot automated categorization of project documents. Project documents, including design reviews, progress reports, etc. contain valuable information and lessons learned.

The pilot project involved two digital collections of project documentation from JPL and one from GSFC. A taxonomy (a series of categories) was developed and the documents were automatically categorized into one of 8 categories using Autonomy's Categorizer product.

The database provides keyword searching to over 3,500 documents with full-text results provided.

Try out the database at:

<http://library01.gsfc.nasa.gov/cioproject>

Goddard Projects Directory

The Goddard Library created a Web database of Goddard missions, projects, and

other related programs, as well as a Historical Goddard Missions database to search for information, links and photos for Goddard missions, spacecraft and instruments.

PIP Catalog (Professional Intern Program)

This Library developed resource catalog lists all PIP presentations which have been placed in the GSFC Library collection from 1983 through 1995. You can Search by keyword for either author / presenter, paper title, or topic. You can also Browse through the PIPs by title.

Goddard Colloquia

Since the early 70's the Library has maintained a

collection of audio and video tapes. Beginning in February 2001, the Library has been Webcasting the IS&T Colloquia.

The Library has developed a Web-based database of all of Goddard's colloquia, historical to the present.

Library users may search the database to identify and locate colloquia to either view from their desktop or to borrow from the Library.

The Collection includes:

- Center Director's
- Engineering
- Information Science & Technology (IS&T)
- Scientific
- Systems Engineering Seminars
